WE DELIVER OR IT IS FREE!

traffic	*Product*	*Price*	*Presentation*	*Closing*
Our technology allows us to offer you with unprecedented services: 1.Unlimited traffic 2.Fast reaction, weeks instead of months or years 3.And best of all, we deliver or it is free **So even if you fail more than once to generate good traffic from our leads technology keeps on bringing you more and more people so you can keep on correcting your mistakes over and over until you get it right and succeed in your business. This is what we do for you, you do the Rest**	**Your products or services are of paramount importance; your visitors must want what you have to offer. It is obvious right? But even if you fail here, because we keep on bringing you people you can correct the issue. How good is it that you have the best product but no one comes?**	**All these visitors found you online, so if your price is not competitive, they can just as easy find your competitors.**	**You must be able to explain quickly and clearly what you offer**	**How will you deliver, get paid, etc, this is probably the easiest but just as important.**

Plan:
we Need to ask the Following Questions
1- What products or services do you want to promote?
2- What are your most profitable products?
3- What are your highest volume products?

Keywords:
1- We create an intuitive keyword list of phrases that you give us
2- we evaluate of the keywords
3- we do keywords analysis
4- we look at those keywords and add more phrases and keywords which you might have missed.

Competition:
1- Using the top 2-3 keywords
2- we look at which websites are getting the first page rankings on every popular search engine.
3- How many pages do their sites have?
4- How many back links does each site have.
5- This will give us an idea of the level of competition you will be facing
6- From that we put or program to scope the competition and learn from said competitors.

Website:

1-We evaluate your website against your plan

2-and your top competition,

3-We list the main differences and input it in our program.

Content:

1-After we've spent some time evaluating your site

2-After we create your keyword bucket based upon what we've read,

3-we ask ourselves what is a better way to describe Your site.

4-You'll notice that you'll probably tell yourself a lot of what you read on your own site.

5-But just because you may understand your content and technical jargon, it doesn't mean others will.

6-This is where our program comes in it evaluates your content and the competitors content and creates simpler content that future visitors will grasp better.

Back Linking:

We use our program build traffic to our customer's pages using web directories, articles, blog postings, etc. Linking back to our customer's site and use the targeted keyword(s) for that page. Back linking works best when you have a natural long-term consistent rate of new links coming in. All back linking to our customers sites happen 100% naturally, we do not farm them.

Measure:

We set-up a measurement systems, with our program which evaluates in advance so it can assess the success of your SEO efforts. This includes all the traffic details presented in a simple back office panel.
